Websit : Creation of a Warhammer 40k army list

Home page:

Creation of a home page where you can access the rest of the site via a burger menu

Login page:

Login or account creation page, for account creation:

The new user must entera username, an e-mail address and a password containing 6 digits with at least 1 lowercase, 1 uppercase, 1 special character and 1 number. The user will then be able to log in and his or her name will appear on every page of the site until logs out.

Create page :

This page lets you choose the faction, then the army you want, then the unit type and finally the unit you want. The user can enter any number of units, or delete one from the list. The user can then save his list and retrieve it on the "save_list" page.

Save list page :

This page is only accessible if the user is logged in, otherwise he/she will be redirected to the login page. On this page, the user can view these saved lists in detail, delete them or export them as pdf files.

What succeeded:

- Create an army list according to faction, army and unit type.
- Saving the list with points and characteristics
- Export the armament list as a pdf file.
- A view of the saved list and the option of viewing it in detail or deleting it.

What failed :

- The implementation of rules for each unit, with the choice of weapons for each
